

# TE1210D Mini jack dual circuit

| Application       |                                                                                                                               |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Connector         | Connector for thermocouple and RTD circuits. Suited for small wires and mineral insulated cable. Can be used for 4-wire RTD's |
| Construction      |                                                                                                                               |
| Temperature limit | Maximum 220°C                                                                                                                 |
| Design            | Rugged one body design                                                                                                        |
| Body material     | Glass filled high quality thermoplastic body with original thermocouple material pins and springloaded inserts                |
| Pins              | Polarized pins ensure proper connection                                                                                       |
| Molded barriers   | Prevent short circuit                                                                                                         |
| Termination       | Stainless Steel screws with Phillips head                                                                                     |
| Wire size         | Accepts wires up to 0.6mm<br>Maximum cable diameter 4.5mm                                                                     |
| Colourcode        | Available in all colour code standards incl. NFE, BS, JIS, etc                                                                |

## Ordering code

\*This datasheet is purely indicative, build-up of model code may vary from this datasheet.
